## HOSHINE

# HS-48TBN 435~455-S7

N-type monocrystalline high-efficiency bifacial double glass module

## 22.8%

Maximum module efficiency

## Product features

#### The whole industry chain integrated production

Polysilicon, wafer, cell, glass, frame, junction box are all self-produced, and the overall compability is better.

#### Better temperature coefficient

Improve power generation at high temperature and increase power output by 1%.

#### Higher bifaciality

Bifaciality can be as high as 85%, with backside gain up to 11.48% in sandy conditions.

#### High conversion efficiency

With outstanding cell technology and advanced manufacturing processes, the module can achieve conversion efficiency up to 22.5%.

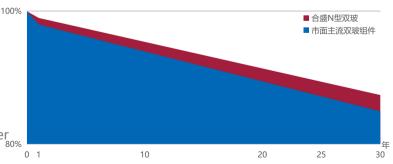

Excellent perfomance in low light intensity Improve the performance of power generation under low light conditions such as in the morning or evening and in cloudy and rainy days.

#### High reliability

The module has better sustainability in harsh environments such as in high-cold areas, desert and mudflats after more rigorous testings.

- 1% 1st-year power degradation
- 30-year linear
  power warranty
- 0.4% annual power<sub>80%</sub> degradation

CE

IEC61215(2016), IEC61730(2016)

ISO9001:2015: Quality Management System (QMS)

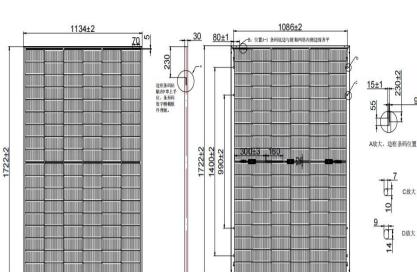

ISO14001:2015: Environmental Management System

ISO45001:2018:Occupational Health and Safety Management System
